Freedom

Definition

noun: 1. the power or right to act, speak, or think as one wants. 2. the state of not being imprisoned or enslaved.

Freedom in Software

- Freedom 0: To use the software for any purpose

Freedom in Software

- Freedom 0: To use the software for any purpose
- Freedom 1: To share the (original) software

Freedom in Software

- Freedom 0: To use the software for any purpose
- Freedom 1: To share the (original) software
- Freedom 2: To modify the software as you see fit

Freedom in Software

- Freedom 0: To use the software for any purpose
- Freedom 1: To share the (original) software
- Freedom 2: To modify the software as you see fit
- Freedom 3: To share copies of the modified software

- Opening up the source code is an essential requirement

Freedom in Software

- Freedom 0: To use the software for any purpose
- Freedom 1: To share the (original) software
- Freedom 2: To modify the software as you see fit
- Freedom 3: To share copies of the modified software

- Opening up the source code is an essential requirement
- Gratis is not Libre (Free as in Freedom!)

Freedom in Hardware

The four freedoms hold. But what do you open? These:

- Hardware design
- Circuit design
- Instructions Sets

Benefits of free software

- Economic benefits

Benefits of free software

- Economic benefits
- Scrutiny of source code

Benefits of free software

- Economic benefits
- Scrutiny of source code
- Standards for software

Benefits of free software

- Economic benefits
- Scrutiny of source code
- Standards for software
- Compatibility

Benefits of free software

- Economic benefits
- Scrutiny of source code
- Standards for software
- Compatibility
- Control over the program

Benefits of free software
